Downloaded free from https://sqa.my/

Marking instructions

In line with SQA's normal practice, the following marking instructions for the Higher Accounting assignment are addressed to the marker. They will also be helpful if you are preparing candidates for course assessment.

Candidates' evidence is submitted to SQA for external marking.

General marking principles

Always apply these general principles. Use them in conjunction with the specific marking instructions, which identify the key features required in candidates' responses.

- a Always use positive marking. This means candidates accumulate marks for the demonstration of relevant skills, knowledge and understanding; marks are not deducted for errors or omissions.
- b If a candidate response does not seem to be covered by either the principles or specific marking instructions, and you are uncertain how to assess it, you must seek guidance from your team leader.
- c Candidates gain marks for showing workings and demonstrating that they have followed accounting processes, even when they present incorrect figures.

d Treatment of errors

The specific marking instructions provide guidance on the treatment of errors such as extraneous items, arithmetical errors and consequential errors.

e Layouts

The specific marking instructions provide layouts for illustrative purposes only. Do not penalise candidates for using appropriate alternative layouts.

f Consequential errors

You must take into account consequential errors. Candidates must receive marks for following the correct accounting processes and using the correct spreadsheet formulae.

g +/- rule

You should check both statements before awarding marks for correct entry of Trial Balance items, as they can only appear once.

h Formulae

Candidates may use a variety of different formulae to solve problems and provide the information needed in the spreadsheet. Award marks where a formula provides the correct answer. The formula in the specific marking instructions is not the only way to achieve the correct answer.

i **Printouts**

Each task clearly provides printing requirements. Where a printout for a task is missing, award marks for the correct information on any available alternative printout.

Task 1(a)				Code	Marks	Max mark	Additional Guidance
Manufacturing Account of OrthoBeds for the year ende	ed 31 Decei	nber Year 3	イ			18	
	£000	£000					
Opening Inventory of Raw Materials		60		А

Task 3(d)

The benefits of decision making to a manufacturing business such as Orthobeds:

It helps to decide whether to accept or reject a special order. (1)

It helps to establish the quantity of each product to be produced to maximise profits (1), taking account of a limiting factor. (1)

It assists in establishing an order of priority when producing a range of products. (1)

It assists when deciding to make or buy a component. (1)

It assists when deciding on whether to retain or close a factory or branch. (1)

DO NOT ACCEPT generic responses eg it allows the business to plan ahead. DO NOT ACCEPT it highlights the products making the highest profit.
