General marking principles for Higher Art and Design

This information is provided to help you understand the general principles you must apply when marking candidate responses to questions in this paper. These principles must be read in conjunction with the detailed marking instructions, which identify the key features required in candidate responses.

Marks for each candidate response must **always** be assigned in line with these general marking principles and the detailed marking instructions for this assessment.

Marking should always be positive. This means that, for each candidate response, marks are accumulated for the demonstration of relevant skills, knowledge and understanding: they are not deducted from a maximum on the basis of errors or omissions.

If a specific candidate response does not seem to be covered by either the principles or detailed marking instructions, and you are uncertain how to assess it, you must seek guidance from your team leader.

It is possible that some candidates could have studied artists and designers that are not known to the Marker. In such cases, Markers are expected to research the artists/designers before marking the response.

The questions are designed to allow as broad a range of responses as possible, taking account of the varied scope for learning about artists' and designers' work and practice across the Course. Markers should consider the extent to which the candidate's response demonstrates their knowledge and understanding of art and design content and context.

No marks should be awarded for simply repeating information from the legend. Where candidates develop this information in their answer, credit can be given for that development.

All questions require candidates to respond in an extended response format. Mark allocations may be fully accessed whether responses are provided in continuous prose, linked statements or a series of developed points.

Points do not need to be made in any particular order, and candidates may provide a number of developed points or a smaller number of points in depth, or a combination of these.

Marks are awarded only for a valid response to the question asked. For example, in response to questions that ask candidates to:

Describe, they must provide a statement or structure of characteristics and/or features.

Explain, they must relate cause and effect and/or make relationships between things clear.

Discuss, they must communicate ideas and information on a subject.

In the Expressive Art Studies questions, where the term 'artist' is used it should be interpreted in its broadest sense, covering painting, printmaking, photography, sculpture, installation, animation, film and video etc. It is acceptable for candidates to refer to groups of artists rather than individuals, eg art movements or artists who work in pairs/groups such as Surrealism, The Boyle Family.

In the Design Studies questions, the term 'designer' should also be inclusive of any form of design. It is acceptable for candidates to refer to design movements, pairs/groups of designers such as Art Deco, Alessi or Timorous Beasties or collections of designs (particularly in fashion/textiles answers) such as The Pirate Collection by Westwood.

Note that for a mark to be awarded, the point of explanation must relate to ways in which the combined use of <i>techniques</i> and choice of <i>scale</i> contribute to the <i>visual impact</i> of the work.</p>
