General marking principles for Higher English: Critical Reading

Always apply these general principles. Use them in conjunction with the detailed marking instructions, which identify the key features required in candidates' responses.

- (a) Always use positive marking. This means candidates accumulate marks for the demonstration of relevant skills, knowledge and understanding; marks are not deducted for errors or omissions.
- (b) If a candidate response does not seem to be covered by either the principles or detailed marking instructions, and you are uncertain how to assess it, you must seek guidance from your team leader.
- (c) We use the term 'possible answers' to allow for any variation in candidate responses. Award marks according to the accuracy and relevance of the candidate's response.
- (d)
 - For **identify** questions, candidates must present in brief form/name.
 - For **explain/in what way** questions, candidates must relate cause and effect and/or make relationships between things clear.
 - For **analyse** questions, candidates must identify features of language and discuss their relationship with the ideas of the passage as a whole. Features of language might include, for example, word choice, imagery, tone, sentence structure, punctuation, sound techniques, versification.
 - For **analyse** questions in a Film and Television Drama context, candidates must identify filmic techniques and discuss their relationship to the text as a whole. Filmic techniques might include, for example, mise-en-scène, lighting, framing, camera movement and sound.
 - For **evaluate** questions, candidates must make a judgement on the effect of the language and/or ideas of the text(s).

Marking instructions for each question

The marking instructions indicate the essential idea that a candidate should provide for each answer.

1. Scottish texts

- Candidates gain marks for their understanding, analysis and evaluation of the extract and either the whole play or novel, or other poems and short stories by the writer.
- In the final 10-mark question the candidate should answer the question in a series of linked statements, or in bullet points.

2. Critical essay

- If a candidate response achieves minimum standards, then the supplementary marking grid allows you to place the work on a scale of marks out of 20.
- First read the essay to establish whether it achieves minimum requirements for technical accuracy, and whether it is relevant to the question. There may be a few errors, but they should not impede understanding. If the essay does not achieve minimum standards, award a maximum of 9 marks. Award up to full marks where the essay communicates clearly at first reading.
- Assessment should be holistic. There are strengths and weaknesses in every piece of writing; assessment should focus as far as possible on the strengths, taking account of weaknesses only when they significantly detract from the overall performance.
- Candidates may display ability across more than one band descriptor. It is important to recognise the closeness of the band descriptors and consider carefully the most appropriate overall band for the candidate's performance.

Once that best fit is decided:

- where the evidence almost matches the level above, award the highest available mark from the range
- where the candidate's work just meets the standard described, award the lowest mark from the range
- otherwise award the mark from the middle of the range.

For band descriptors of 4 marks take the following approach. For example if 9-6 best describes the candidate's work, reconsider the candidate's abilities in the three main areas: knowledge and understanding; analysis; evaluation. If the candidate just misses a 9, award an 8. If the candidate is slightly above a 6, award a 7.
