Graphic Communication

WEDNESDAY, 10 MAY 1:00 PM – 3:00 PM

Fill in these box	ces and read v	vhat is printe	d below.	
Full name of cer	ntre		Town	
Forename(s)		Surr	name	Number of seat
Date of bir				
Day	Month	Year	Scottish candidate numbe	r

Total marks — 70

Attempt ALL questions.

All dimensions are in mm.

All technical sketches and drawings use third angle projection.

You may use rulers, compasses or trammels for measuring.

In all questions you may use sketches and annotations to support your answer if you wish.

Write your answers clearly in the spaces provided in this booklet. Additional space for answers is provided at the end of this booklet. If you use this space you must clearly identify the question number you are attempting.

Use blue or black ink.

Before leaving the examination room you must give this booklet to the Invigilator; if you do not, you may lose all the marks for this paper.

Downloaded free from https://sqa.my/

1. A CAD technician created a 3D model of the bicycle, shown below.

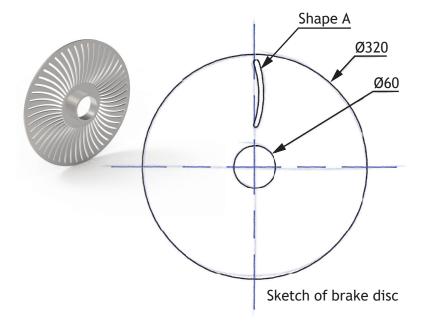

(a)

Describe, giving two reasons, how the 3D CAD model can be used to support manufacture through testing.

(continued)

MARKS DO NOT WRITE IN THIS MARGIN

(b) A new brake disc design was requested for the bicycle.

Shape A was to be repeated 60 times. State the CAD edit that would be used to create the feature.

1

(c) The bicycle uses a spring as part of the suspension system, shown below.

The spring was modelled as a separate component using 3D CAD.

Describe the 3D CAD technique used to model the spring.

You must make reference to the dimensions above.

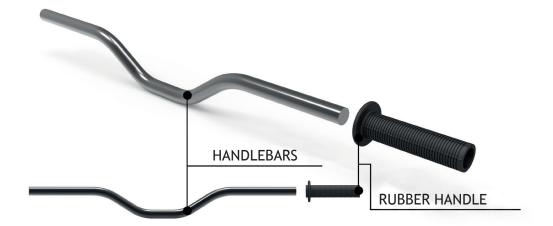

You may use sketches to illustrate your answer.

3

Page 04

(d) The handlebars were 3D CAD modelled as a single component. Describe the modelling technique used to generate the component. You may use sketches to illustrate your answer.

2

Rubber handles were required to cover the handlebars.

The CAD technician used top down modelling to create the rubber handles.

(e)	Describe	two	advantages	of	top	down	modelling	in	relation	to	these	
	compone	nts.										2

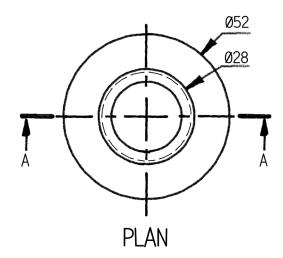

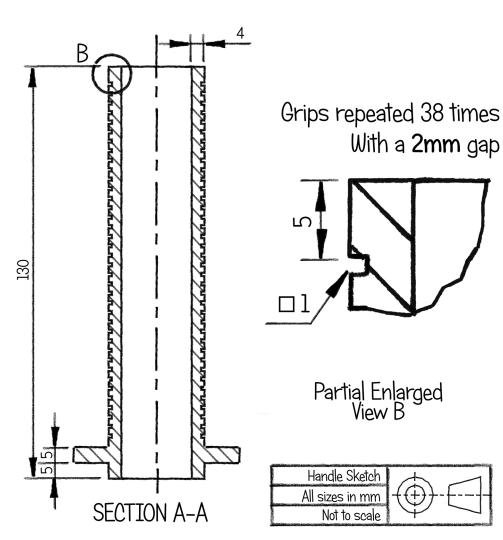

1. (continued)

DO NOT WRITE IN THIS MARGIN

(f) The shape of the rubber handle was sketched prior to being modelled using 3D CAD.

The orthographic sketch of the rubber handle is shown below.

(b) A construction company uses CAD software that makes use of **cloud computing**. The company engineers visit construction sites on a regular basis and require access to the most current CAD data.

(i)	Describe two advantages that cloud computing can offer the construction company.
(ii)	Describe two disadvantages of cloud storage.

3. A layout from a health magazine is shown below.

(a) The graphic designer has used **emphasis** in the layout shown above. Describe how each of these items has been emphasised.

(i)	The pull quote.	,
(ii)	The body text.	1
(iii)	The photograph of the model.	

3. (continued)

MARKS DO NOT WRITE IN THIS MARGIN

(b)	Explain, giving two reasons, why the graphic designer has limited the use of colour in the layout.	2
(c)	Describe the effect of using both serif and sans serif fonts in this layout.	1
d)	The title is in a serif typeface which the graphic designer felt was suitable for use in the layout.	
	Explain why this is a suitable typeface for this layout.	1
e)	Describe how the graphic designer has created rhythm in the layout.	1
f)	Describe how the graphic designer has created texture in the layout.	1
g)	Describe how the graphic designer has used value in the layout.	1

(b) High-resolution images used in the magazine were downloaded from a photo stock website for a small cost.

(i)	Explain what is meant by the term high-resolution.

(ii) State the name of a suitable file type for an image.

(c) Prior to paying for the high-resolution images, low-resolution samples were available to download for free. These images contained watermarks, as shown above.

Explain, giving two reasons, why watermarks are added to the free images.

1

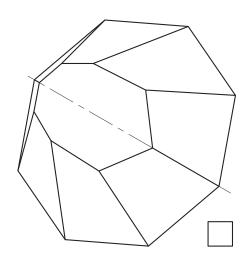

(continued) 5.

(a) Indicate the correct **auxiliary view** by ticking (✓) a box below. Use a ruler, trammel or compasses to measure.

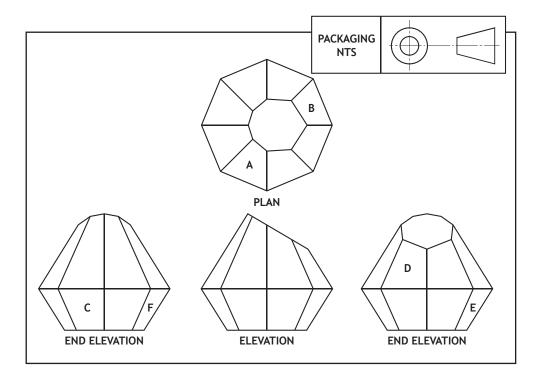

Page 19

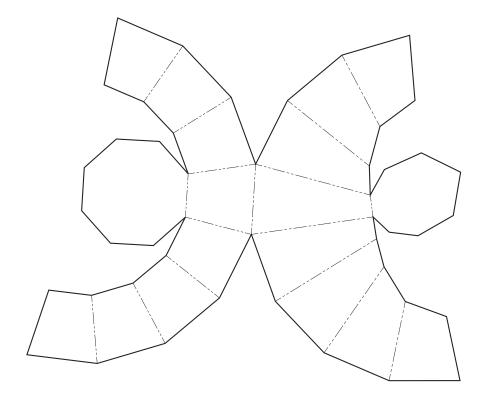

(continued)

MARKS DO NOT WRITE IN THIS MARGIN

(b) The orthographic drawing of the packaging is shown below. The packaging will have different information on various faces.

Indicate the position of faces A-F on the surface development below. 6 The surface development is shown from the outside.

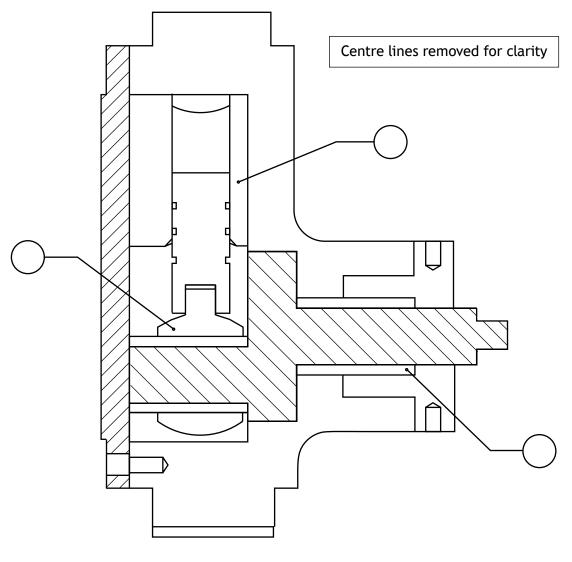

Page 20

6

6. A CAD technician created a 3D model and technical drawing of an oil pump.

Use the exploded view and parts list on the **Supplementary Sheet for use**with **Question 6**, provided, to answer this question.

SECTION A-A

- (a) Complete Section A–A above by applying hatching lines to appropriate areas in accordance to British Standard conventions.
- (b) Add the part number of the three components indicated on Section A–A above.
