## General marking principles for Higher Religious, Moral and Philosophical Studies

*Always apply these general principles. Use them in conjunction with the detailed marking instructions, which identify the key features required in candidates' responses.*

- (a) Always use positive marking. This means candidates accumulate marks for the demonstration of relevant skills, knowledge and understanding; marks are not deducted for errors or omissions.
- (b) If a candidate response does not seem to be covered by either the principles or detailed marking instructions, and you are uncertain how to assess it, you must seek guidance from your team leader.
- (c) Award marks where candidates give points of knowledge without specifying the context, unless it is clear that they do not refer to the context of the question. Award a maximum of **8 marks** where the candidate has not attempted either skill in a **20 mark** question.

In this question paper the following skills are assessed:

- i. knowledge and understanding
- ii. analysis
- iii. evaluation.

### (i) Knowledge and understanding

Knowledge and understanding involves presenting relevant and accurate content. Award a knowledge and understanding mark where a candidate presents a relevant and accurate point which may include:

- accurate factual information
- relevant factual information
- reference to sources
- case studies
- examples
- viewpoints
- description of arguments.

### (ii) Analysis

Analysis involves doing something with factual information, for example identifying parts, the relationship between them, and their relationships with the whole; drawing out and relating implications.

Award an analysis mark where a candidate presents a relevant, accurate and developed point which may include:

- links between different components
- links between component(s) and the whole
- links between component(s) and related concepts
- similarities and contradictions
- consistency and inconsistency
- different views/interpretations
- possible consequences/implications
- the relative importance of components
- understanding of underlying order or structure.

**(iii) Evaluation**

Evaluation involves making a judgement or measurement based on an issue. Award an evaluation mark where a candidate presents a relevant, accurate and developed point which may include:

- the relevance and/or importance and/or usefulness of a viewpoint or source
- positive and negative aspects
- strengths and weaknesses
- any other relevant evaluative comment.

Note: statement of arguments of different sides of an issue is not evaluation.

**Use of sources**

Award marks where candidates use a relevant source in support of their knowledge and understanding, critical analysis, evaluation or a reasoned view.

**Overview of detailed marking instructions**

**Knowledge, analysis and evaluation questions (20 marks)**

Award up to **a maximum of 10 marks** for each developed point of knowledge used to support the analysis and evaluation.

Award up to **5 marks** for analytical comments and up to **5 marks** for reasoned evaluative comments.

This is because human beings should always be treated with dignity and respect and manipulating someone into donating an organ through guilt is always morally wrong</li> <li>• I also agree with this because there is a risk involved in donating an organ as a living donor; this could result in pain, discomfort and even death, therefore no one should ever feel pressurised into donating organs</li> </ul> |
